

Lettuce

Goals: Increase Head Size Reduce Tip-Burn

All growers have goals for their crops. This lettuce grower wanted to increase his quality and reduce tip-burn occurrence. Over the course of 3 growing seasons, he pitted Nutrient Technologies' program against his standard products.

Tip-burn incidence and head size were assessed to determine the better program.

The **Nutrient Technologies program** was the **only** fertilizer protocol that **achieved the goal**.

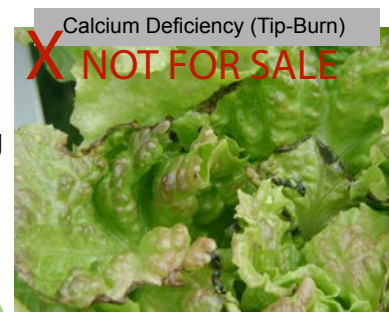

Our foliar program, including **Tech-Gro MiraCal 30%** increased the desired 24-box count by **35%** and reduced tip-burn by **10%**.

What does that mean for the grower?

It means that his average price per box went from \$12.01 to \$13.17 after using Nutrient Technologies' spray program.*

That's almost a 10% increase in the value of his crop!

When quality matters, *Grow With Us!*

*Prices according to USDA June, 2018. For more detailed trial information, contact us info@techflo.com Always read and follow label.
