

ROOTERRA™

RAPID ESTABLISHMENT OF NEW PLANTINGS

ROOTERRA 9-3-7 is a next generation biostimulant. It contains synergistic natural compounds, trace elements, and essential nutrients to promote the rapid establishment of new plantings.

The combination of nutrients in **ROOTERRA** is intended to stimulate early root development, plant vigor, and growth to maximize crop yield and quality.

Field Trials

All types of permanent crops have been tested, with different establishment methods, and all have shown a response to ROOTERRA with positive effects on crop growth and yield.

- Increase # of branches
- Increase # of shoots
- Increase root mass
- Better yields
