RECOMMENDED USES FOR AQUA SURGE™

Aqua Surge is a patented technology that enhances the infiltration and penetration of applied irrigation water and rainfall in agricultural soils. Aqua Surge will enhance irrigation efficiency and improve moisture levels in the soil providing a better growing environment for plants. Aqua Surge may be applied through any type of irrigation system or by conventional spray equipment.

Uniformly apply the suggested rates in the following amounts of water per acre.

COMPATIBILITY: This product is compatible with most fertilizers and crop protection materials. A compatibility test is recommended when using new combinations. Consult a Nutrient TECH™ representative for additional information.

DIRECTIONS FOR USE

INJECTION THROUGH IRRIGATION SYSTEMS: Inject Aqua Surge at 1-4 quarts per acre through any type of irrigation system.

CONVENTIONAL SPRAYERS: Aqua Surge may be spray applied at 1-4 quarts per acre. Irrigation or rainfall should follow application.

TRANSPLANT PURPOSES: Add Aqua Surge at 1-4 quarts per 1,000 gallons of transplant water.

Store in a cool, dry, well-ventilated area away from heat, combustible and incompatible materials. Dispose of unused contents, container, and other contaminated wastes in accordance with local, state, and federal law.
