

Microbial Inoculant for SOIL ENHANCEMENT

KEEP OUT OF REACH OF CHILDREN

WARNING: The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) that are toxic to ruminant animals. Use according to manufacturer's directions.

WARNING: Causes eye and skin irritation

Wear protective clothing, gloves, eye and face protection. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Remove and wash contaminated clothing before reuse. Avoid breathing vapor, mist or dust from this product. Not for human or animal consumption.

If in eyes: Rinse thoroughly with water for several minutes. Continue rinsing and get medical attention if eye irritation persists.

If on skin: Wash with plenty of soap and water.

If swallowed: Rinse mouth and get medical attention if you feel unwell.

SHAKE WELL BEFORE USING
MAINTAIN ADEQUATE AGITATION AT ALL TIMES DURING MIXING AND APPLICATION.

Warning: Cancer and Reproductive Harm

RECOMMENDED USES FOR BAC-T GROW

Uniformly apply the suggested rates in the following amounts of water per acre.

COMPATIBILITY: This product is compatible with most crop protection materials. A compatibility test is recommended when using new combinations. Consult a Nutrient TECH™ representative for additional information. Always read the product labels and follow the manufacturers' instructions for all products at all times. Some factors, outside the control of the manufacturer or distributor, may have repercussions on the performance of co-applied products. Therefore, the co-application is made at the risk of the end user. When combining with other components in a tank-mix, always add this product in last. If there is any doubt at all, consult the manufacturer or distributor concerned.

DIRECTIONS FOR USE

SHAKE BEFORE USE: For better efficacy use the product alone in a spray or fertigation. Clean sprayer before use and avoid any delays between mixing active ingredient and use. Do not use in chlorinated water. Do not apply the product within 4 days before or 7 days after herbicide spraying. Can be mixed with most fertilizers and fungicide solutions, only after dilution in the final mixture. When mixed with other products, always perform a compatibility test first. Add the product in last.

APPLICATION RATE: Apply 7-8 ounces/acre directly to soil or through fertigation. Use a minimum 20 gpa for broadcast applications. Water mixture volume for spray applications: 20-100 gallons per acre. Spray the concentrated solution on crop residue when possible. It is recommended to spray on crop stubble, in the morning, evening or on overcast days to avoid excessive exposure to sunlight. Bury the stubble by plowing, or by a shallow tillage of the soil not later than 24 hours after spraying OR plant within 24 hours after application.

FOR SOIL APPLICATION

	Dilution	Rate	Application Timing
Field, Row, Vegetable, Tree & Vine Crops	20-100 g/acre	7-8 fl oz/acre	Band apply to soil concentrating Bac-T Grow where active roots will be. Bac-T Grow can be fertigated with drip or microsprinkler irrigation.

Do not apply in treated water (chlorine, peracetic acid or other oxidizers). Apply the product slowly into fertigation equipment in the early part of the water application.

STORAGE CONDITIONS: Keep in original container out of direct sunlight, tightly closed, in a safe place AWAY FROM CHILDREN and ANIMALS AND AT A TEMPERATURE OF BETWEEN AND including 39° F and 77° F. Store away from frost. Do not expose to frost and temperatures > 95° F.
