## RECOMMENDED USES FOR CAL ARMOR

Humic acids may aid in the uptake of micronutrients.

Uniformly apply the suggested rates per acre in the irrigation water with calcium containing or other liquid fertilizers. Soil band applications should be watered in within 2 days. Co-application with a quality soil surfactant such as Aqua Surge will benefit distribution of Cal Armor in the soil.

**COMPATIBILITY:** This product is compatible with most crop fertilizer materials. A compatibility test is recommended when using new combinations. Consult a Nutrient TECH™ representative for additional information.

### SOIL APPLICATION RATES (Apply through fertigation, or band apply over root zone)

**LEAFY GREENS, ROOT, TUBER AND BULB VEGETABLES, FRUITING VEGETABLES AND STRAWBERRIES:** 2 qts/acre at transplanting through pre-harvest, repeat every 21-28 days

**ESTABLISHING YOUNG PERENNIAL PLANTING (Trees and Vines):** 2 qts/acre from bud-break every 21-35 days

**FRUIT AND NUT TREES, CITRUS, GRAPES, HOPS AND CANE BERRIES:** 2 qts/acre from bud-break through post harvest every 21-35 days

**SEED CROPS, FIELD CROPS, ALL OTHER CROPS:** 2 qts/acre from planting through bloom, repeat every 21-28 days

If more frequent applications are desired, reduce use rate to 1/3-1/5 the rates above - (12-20 fl oz/acre per week).

**This product is not intended for foliar applicatoin.**

**Store in a cool, dry, well-ventilated area away from heat, combustible and incompatible materials. Dispose of unused contents, container, and other contaminated wastes in accordance with local, state, and federal law.**
