RECOMMENDED USES FOR FOLIBAC PRO

Uniformly apply the suggested rates in the following amounts of water per acre. Do not spray to run off from plants

COMPATIBILITY: This product is compatible with most crop protection materials. A compatibility test is recommended when using new combinations. Consult a Nutrient TECH™ representative for additional information. Always read the product labels and follow the manufacturers' instructions for all products at all times. Some factors, outside the control of the manufacturer or distributor, may have repercussions on the performance of co-applied products. Therefore, the co-application is made at the risk of the end user. When combining with other components in a tank-mix, always add this product in last. If there is any doubt at all, consult the manufacturer or distributor concerned.

DIRECTIONS FOR USE

SHAKE BEFORE USE: For better efficacy use the product alone in a spray. Clean sprayer before use and avoid any delays between mixing active ingredient and use. Do not use in chlorinated water. Do not apply the product within 4 days before or 7 days after herbicide spraying. Can be mixed with most fertilizers and fungicide solutions, only after dilution in the final mixture. When mixed with other products, always perform a compatibility test first. Add the product in last.
