

Field Boost® Zinc 50

A Concentrated Essential Nutrient for Plant Nutrition

KEEP OUT OF REACH OF CHILDREN

WARNING: The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) that are toxic to ruminant animals. Use according to manufacturer's directions.

WARNING: Toxic to aquatic life with long lasting effects

Wear protective clothing, gloves, eye and face protection. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Remove and wash contaminated clothing before reuse. Avoid breathing vapor, mist or dust from this product. Not for human or animal consumption.

If in eyes: Rinse thoroughly with water for several minutes. Continue rinsing and get medical attention if eye irritation persists.

If on skin: Wash with plenty of soap and water.

If swallowed: Rinse mouth and get medical attention if you feel unwell.

SHAKE WELL BEFORE USING
MAINTAIN ADEQUATE AGITATION AT ALL TIMES
DURING MIXING AND APPLICATION.

F1132

Field Boost[®] Zinc 50

provides an essential plant nutrient in a highly concentrated, easy to use, flowable formulation for use as a fertilizer coating.

DIRECTIONS FOR USE

Apply 2-10 quarts per ton depending upon dry fertilizer blend components, blend application rate and equipment parameters. Apply Field Boost uniformly over the fertilizer while mixing thoroughly. When applying crop protection chemicals with dry bulk granular fertilizers, follow all directions for use, restrictions and precautions on the respective tank mix product labels.

This product is not intended for use directly on crops, soil, or via application through irrigation systems.

COMPATIBILITY: Field Boost may be mixed with various fertilizer enhancers and crop protection products. A compatibility test is recommended when using new combinations of dry fertilizer ingredients and/or fertilizer enhancers and crop protection products. Since fertilizers can vary, even within the same analysis, a compatibility test is recommended with fertilizer materials each time before use. If the Field Boost/fertilizer mixture is too wet, use of a drying agent may provide a dry, free-flowing mixture. Absorptive materials should be added only after the Field Boost has been thoroughly blended into the fertilizer mixture. Consult a Nutrient TECH[™] representative for additional information.

Avoid extreme temperature fluctuations. Store between 50° and 90° F in a cool, dry, well-ventilated area away from heat, combustible and incompatible materials. Protect from freezing during use. Opened product requires monthly agitation. Dispose of unused contents, container, and other contaminated wastes in accordance with local, state, and federal law.
