

Liquid

Foliar/Soil

Microalgae

### Compatible:

- With all other agricultural products
- With existing or new application plan
- Seamlessly integrates into your routine

### Flexible:

- Add Surety<sup>®</sup> MA to your application plan at your convenience
- Flexibility to optimize your crop management strategy according to your needs and timeline

### Consistent:

- Backed by a production process that prioritizes quality and consistency
- Every application delivers reliable results
- Consistent performance for sustained crop excellence

Surety MA rapidly upregulates genes, to help the plant do what it would naturally to a higher level of production

Surety MA activates plant's genes that are critical to uptake and assimilates nutrients

Surety MA stimulates root development and vegetative plant growth

Surety MA rapidly upregulates genes, to increase chlorophyll production to maintain a higher level of photosynthesis under stress

Surety MA enhances nutrient use efficiency

Surety MA increases drought tolerance
