

NexxGen™

NexxGen™ is a unique, biostimulant designed to boost plant metabolism, increase number of harvestable fruit and improve nutrient assimilation and utilization. It also enables the plant to resist impacts of environmental stress to secure good fruit setting leading to increased yields.

KEY COMPONENTS:

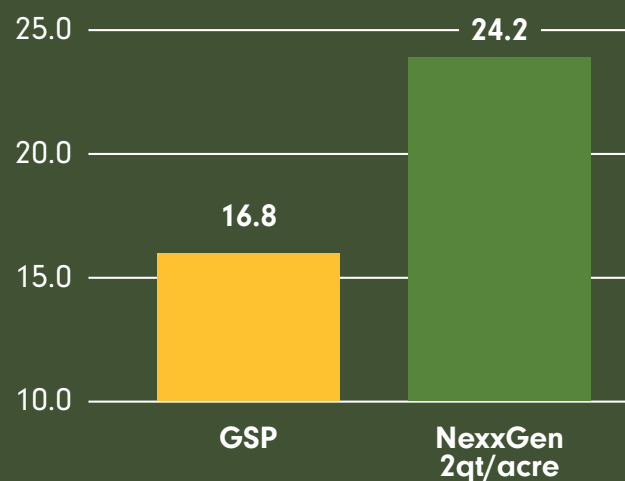

- Contains 5 selected L-amino acids needed by the plant to enhance specific aspects of development.
- Contains seaweed (*Ascophyllum nodosum*) extract obtained through a safe, non-denatured, extraction process. Promotes induction of anti-stress phytoalexins and efficient nutrient assimilation.
- Micronutrients and trace elements promote cellular response to stimulatory compounds.

BENEFITS OF USE:

- Increased number of fruit per tree, without any apparent decrease in fruit size. (Tango)
- Increased number of fruit per tree in 2 "off cycles" and 1 "on cycle" of trial trees. (Tango)
- Increased number of bins harvested per acre from increased number of fruit per tree. (Page)
