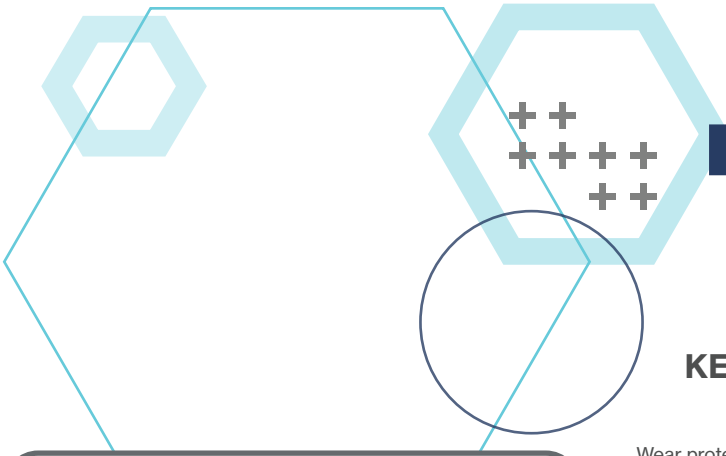
Nutrient.TECH™

# SURETY® MA

## Microalgae

**1-0-0**

**Essential Nutrient for Plant Nutrition**



## GUARANTEED ANALYSIS

Total Nitrogen (N) ..... 1.0%

1.0% .....Water Soluble Nitrogen

**Derived from:** Microalgae protein hydrolysate

Protein Hydrolysate is defined by AAPFCO as the organic material obtained by the hydrolysis of proteins to their constituent amino acids and short polypeptides.

**8.7 lbs/gal at 68°F** **F1132**

## KEEP OUT OF REACH OF CHILDREN

Wear protective clothing, gloves, eye and face protection. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Remove and wash contaminated clothing before reuse. Avoid breathing vapor, mist or dust from this product. Not for human or animal consumption.

**If in eyes:** Rinse thoroughly with water for 15 minutes. Continue rinsing and get medical attention if eye irritation persists.
**If on skin:** Wash with plenty of soap and water.
**If swallowed:** Rinse mouth and get medical attention if you feel unwell.

## SHAKE WELL BEFORE USING

**MAINTAIN ADEQUATE AGITATION AT ALL TIMES DURING MIXING AND APPLICATION.**

## RECOMMENDED USES FOR SURETY MA

Uniformly apply the suggested rates to soil or crop.

**COMPATIBILITY:** This product is compatible with most crop protection materials. A compatibility test is recommended when using new combinations. Consult a Nutrient TECH™ representative for additional information.

| SOIL APPLICATION RATES (Direct Application and Fertigation) | |
|---|---|
| **All vegetable crops** | Apply 0.5-2 pints/acre at planting or transplanting or with first fertilization |
| **Young Perennial Planting** (Trees and Vines) | 1-2 qts/acre at planting or with first fertilizer application |
| **Citrus, Deciduous Fruit and Nut Trees** | 1-2 qts/acre with first fertilizer application |
| **Grapes, Vines, Hops** | 1-2 qts/acre with first fertilizer application |
| **Berries** | 1-2 qts/acre with first fertilizer application, Strawberries: repeat every 14-28 days |
| **Corn, cotton, soybean, small grains, oil seeds, sugar beets** | 0.5-2 pints/acre in-furrow or over seed drill at planting or at side-dressing or layby application |

**ROOT DIPPING/TRANSPLANT SOLUTION:** Apply at 1.75-3.0 fl. oz/ 500 gal. (root dip). Use at 1 fl. oz/ 500 gal. (transplant solutions)

| FOLIAR APPPLICATION RATES (Air or Ground) | |
|---|---|
| **All vegetable crops:** 1-3 pints/acre at 2-5 leaf stage. **Fruiting Vegetables:** repeat application at flower budding to early flower and again at fruit sizing. **Leafy Greens:** reapply at 14-28 day intervals. | |
| **Young Perennial Planting** (Trees and Vines) | 1-4 pints/acre at shoot expansion (BBCH 31-37) |
| **Citrus, Deciduous Fruit and Almond Trees** | 1-4 pints/acre at shoot expansion (BBCH 31-37), repeat at full fruit budding (BBCH 55) and fruit set (BBCH 70) |
| **Walnut, Pecan, Pistachio and Filbert** | 1-4 pints/acre at fruit set (BBCH 70) |
| **Grapes, Vines, Hops, Cane and Blue Berries** | 1-4 pints/acre at shoot development (BBCH 30-35): repeat at fruit budding (BBCH 55) and again at fruit set (BBCH 70) or reapply at 14-28 day intervals |
| **Strawberries** | 1-3 pints/acre at 5-10 leaves (BBCH 15-20): repeat at flower bud formation (BBCH 50-55) and fruit sizing (BBCH 70) or reapply at 14-28 day intervals |
| **Corn, Soybean** | 1-2 pints/acre at pre-flowering V5-V9 (BBCH 15-35). Corn: repeat at tasseling to blister stage/ VT-R2 (BBCH 50-70) Soybean: flower buds to early bloom Vn-R2 (BBCH 51-63) |
| **Cotton, Oil Seeds** | 1-2 pints/acre with early sprays at 3-8 leaves (BBCH 14-35): Repeat with flower buds to early flowering (BBCH 51-62). |

**Store in a cool, dry, well-ventilated area away from heat, combustible and incompatible materials. Dispose of unused contents, container, and other contaminated wastes in accordance with local, state, and federal law.**
